DISCLAIMER

It is important to note that with "All-Over" dye sublimation printing, there are inconsistencies that will occur from print to print. The most common inconsistency that will occur is in the form of white wrinkles in the fabric that are most likely to appear on anywhere on the fabric. Another inconsistency that can occur is called "ghosting." This happens when the dye gas settles into the fabric in unintended areas. These inconsistencies are part of the nature of the dye sublimation process and there's nothing that can be done to prevent them. For this reason, we do not issue refunds or discounts for any of these kinds of issues with dye sublimation orders.
